

App Store Review Information

Skin Care AI: Routine Coach

Prepared for Apple App Review

Document date: May 29, 2026

Bundle ID: com.skincare.routineai

Version: 1.0.0 (Build 3)

Platform: iOS

Category: Health & Fitness / Lifestyle (wellness)

2. Devices and operating systems tested before submission

The app was tested on the following devices and OS versions prior to submission for App Review:

- iPhone 15 Pro - iOS 18.x (primary device; full feature and IAP sandbox testing)
- iPhone 14 - iOS 17.x (layout, onboarding, navigation)
- iPhone SE 3rd gen - iOS 17.x (smaller screen layout)
- iOS Simulator - iOS 18.x (Xcode; UI flows and onboarding)
- iOS Simulator - iOS 17.x (backward compatibility spot-check)

Build environment: Flutter 3.x, Xcode (current stable). Release and TestFlight builds were used for In-App Purchase testing with a Sandbox Apple ID. Replace device rows above with your exact hardware if different.

3. App purpose, target audience, problem solved, and value provided

Purpose:

Skin Care AI: Routine Coach helps users build and maintain a consistent skincare routine through habit tracking, morning and night routine checklists, progress photos, and AI-powered wellness coaching. The app does not provide medical diagnosis or treatment.

Target audience:

Adults interested in skincare consistency, including beginners establishing a routine and users tracking concerns such as breakouts, uneven tone, dryness, sensitivity, or oil control over time.

Problem it solves:

Many users struggle to stay consistent with cleansing, SPF, hydration, and product routines, and lack a simple way to visualize progress over weeks. The app consolidates routine steps, daily habits, and photo check-ins in one focused experience.

Value provided:

- Personalized onboarding and home dashboard insights
- Morning and night routine planner with check-offs
- Daily habit tracking for skin-friendly behaviors
- Progress photo timeline and AI-assisted observations
- AI coach chat for routine and product consistency questions
- Optional Premium: unlimited uploads, full history, advanced insights

Disclaimer: For general wellness and education only. Not a substitute for professional medical advice, diagnosis, or treatment.

4. Setup instructions and access to main features (login, credentials, samples)

Login and account requirements:

No login or user account is required. No test credentials are needed. App data is stored locally on the device using on-device preferences.

Reviewer setup steps:

- 1. Install the submitted build from App Review or TestFlight.
- 2. On first launch, complete the onboarding questionnaire (tap Continue through all screens, then Start my routine).
- 3. When prompted, allow Camera and/or Photo Library access for progress photos.
- 4. Ensure an active internet connection for AI features (see Section 5).

Main features - how to access:

- Home dashboard: Bottom tab Home - routine score and insights (full metrics require Premium).
- Routine plan: Tab Routine - morning/night steps and nutrition tips.
- Progress photos: Center + button - choose camera or photo library; AI analysis runs after upload.
- Progress history: Tab Progress - timeline of check-ins.
- Daily habits: Tab Habits.
- AI coach: Accessible from the in-app coach flow after onboarding.
- Settings / dark mode: Settings icon on Home tab.
- Premium upgrade: Settings > Upgrade to Premium, or Progress tab > Unlock Premium, or attempt a second progress upload on the free plan.

In-App Purchase testing (Sandbox):

- On the test device: Settings > App Store > Sandbox Account - sign in with a Sandbox tester.
- Open the app > Settings > Upgrade to Premium (or Progress > Unlock Premium).
- Purchase Monthly, Yearly, or Lifetime; verify Restore purchases.

Product identifiers:

- com.skincare.routineai.premium.monthly (auto-renewable subscription)
- com.skincare.routineai.premium.yearly (auto-renewable subscription)
- com.skincare.routineai.premium.lifetime (non-consumable)

Sample files: Not required. Reviewers may use any appropriate photo from the device camera roll or simulator library.

Free vs Premium: Free plan allows one progress upload per rolling 7-day window and limited timeline/history. Premium unlocks unlimited uploads, full history, and full home insights.

5. External services, tools, and platforms (core functionality)

The app uses the following third-party services:

- OpenRouter (<https://openrouter.ai/api/v1/chat/completions>) - AI chat coach, personalized content generation, and photo analysis. Data sent when user triggers AI: chat messages, onboarding context, and progress photos (base64-encoded images). API authentication via server-side/developer-configured API key in the app build.
- Apple In-App Purchase (StoreKit) - Monthly and yearly auto-renewable subscriptions and lifetime non-consumable unlock. Payments processed entirely by Apple.
- Apple Camera and Photo Library - User-initiated progress photo capture and selection. Processed on-device; only sent to AI when user runs analysis.
- Google Fonts (via `google_fonts` package) - UI typography; standard font delivery.
- Default AI model (configurable): `google/gemma-4-31b-it` via OpenRouter.

Not used in current version: Firebase, custom backend authentication, Stripe, advertising SDKs, or third-party analytics SDKs.

Legal links in app:

- Terms of Service: <https://www.writecream.com/terms-of-service/>
- Apple Licensed Application EULA (linked from premium paywall)

6. Regional differences in features or content

The app functions consistently across all App Store regions where it is distributed. There are no region-specific feature gates, geo-fenced content modules, or territory-only UI variations.

Subscription and lifetime pricing follow Apple's regional App Store pricing. In-app fallback display prices (when store prices are loading): Monthly \$4.99, Yearly \$29.99, Lifetime \$59.99 USD equivalent tiers.

AI responses are primarily in English; the chat coach may respond in other languages if the user writes in them. No region-specific medical or legal content variants are included.

Confirmation: Feature parity across all supported territories.

7. Regulated industry, protected content, and authorization

Industry classification:

General wellness and skincare routine tracking. The app is NOT a medical device and does NOT provide medical diagnosis, prescription, or treatment. Copy and AI system prompts explicitly state the app is not a doctor and users should consult qualified healthcare professionals for medical concerns.

Authorization and credentials:

- No FDA clearance or medical-device registration - app does not claim regulated medical functionality.
- No licensed clinical diagnostic content - coaching and educational routine guidance only.
- AI content is generated via OpenRouter using configured models; no redistribution of proprietary clinical databases or copyrighted medical guides.
- User-submitted photos only; no stock medical imagery requiring separate licensing.
- Developer Terms of Service linked in-app (Writecream URL above; update to your entity before production if needed).
- Privacy Policy URL: [REQUIRED - insert your live privacy policy URL before submission]
- Support URL: [Insert your support page or contact URL before submission]

If additional clarification is needed: This app is comparable to lifestyle, habit, and beauty journaling applications with explicit non-medical disclaimers in AI prompts and photo analysis flows.

Quick reference - Notes for Review (summary):

No login required. Complete onboarding, then use + to add a progress photo (allow Camera/Photos). Premium: Sandbox Apple ID > Settings > Upgrade to Premium. Product IDs: com.skincare.routineai.premium.monthly, .yearly, .lifetime. AI requires network (OpenRouter). Not medical advice. Same features in all regions. Update Privacy Policy and Support URLs before submit.
